SUMMARY

Software Engineer with 4+ years of experience developing cross-platform applications across healthcare, retail, logistics, and consumer domains. Skilled in building scalable, high-performance solutions and delivering products from architecture and development through production release. Passionate about clean software design, developer tooling, and creating impactful user experiences..

EXPERIENCE

Lead Mobile Engineer | *Glidix Technologies LLC* | Apr 2025 – Present

- Develop enterprise applications across ERP, CRM, HRM, healthcare, retail, and AI-powered recruitment domains, delivering scalable solutions for both enterprise and consumer platforms.
- Designed modular monorepo architectures, maintained shared packages, and conducted code reviews to improve code quality, reuse, and development efficiency.
- Build offline-first solutions using Drift, ObjectBox, Hive, and SQLite with reliable synchronization mechanisms.
- Implement integrations including QR scanning, geofencing, Google Maps, Firebase services, printers and payment systems.
- Manage end-to-end mobile release processes including App Store Connect, Google Play Console, TestFlight, certificates, and production deployments.

Software Engineer | *VAAS Intelligent Technology Services Pvt. Ltd* | Dec 2022 – Apr 2025

- Led mobile development of Chavara Matrimony, a leading matrimonial platform, building responsive user experiences, scalable Flutter architecture, payment integrations, and CI/CD automation.
- Developed cross-platform applications across food delivery, healthcare, real estate, and service management domains.
- Architected core application layers including networking, state management, routing, and theming.
- Built offline-first POS, warehouse, inventory, and order-tracking solutions for mobile, desktop platforms.
- Integrated payment gateways, push notifications, location services, and real-time tracking features.

PERSONAL PROJECTS

- Flutter Upgrade Helper - Open-source web tool for Flutter SDK migrations with version-to-version template comparison, GitHub-style diffs, and AI-ready upgrade prompts.
- Widget Theme - Open-source code generation package for design systems, widget libraries, and reusable UI frameworks, simplifying scalable theming and customization.
- Flutter Onscreen Keyboard - Open-source Flutter package for customizable on-screen keyboards supporting desktop and mobile platforms.
- J2M - Web-based tool that generates model classes from JSON for Dart, JavaScript, and Kotlin with configurable code generation options.
- ZapCall - Cross-platform video calling application built with Flutter, WebRTC, and Firebase.

SKILLS

Languages & Frameworks: Dart, Flutter, Riverpod, JavaScript, Express.js, NextJS

Databases & Storage: PostgreSQL, SQLite, Drift, ObjectBox, Hive, Firebase, MongoDB, Prisma

Tools & Practices: Git, Fastlane, Docker, Monorepos, Clean Architecture, CI/CD, Code review
